

In the Specification:

Please substitute and enter the following paragraph for the paragraph that begins on page 28, line 25, as follows:

A' Further, the ~~detection~~ detector assembly 180 can include an electron lens 188 and a contrast aperture 190 positioned below the mask 101. The design of the electron lens 188 and the contrast aperture 190 can be varied. The design of the electron lens 188 can be similar to the projection lens positioned just above the mask 101.
